

APHIS Core: Required Information for the Import of Farm Machinery

The following information is required to import farm machinery.

Please advise the type of equipment you import:

- New equipment (can be disclaimed as not regulated by APHIS)
- Used equipment
- Both new and used equipment

For the import of used equipment, please check the boxes appropriate to your shipment:

- This used equipment originates from a region free of foot-and-mouth disease (FMD)[†].
 - Statement[†] is included indicating that the equipment is clean, dry, and free of animal material, soil, and contamination. Unclean/contaminated equipment must be washed prior to entry.
- This used equipment originates from a known FMD region.
 - Original steam cleaning certificate[†] is included and is issued by the foreign government's animal health service or agency.

[†]See "[APHIS Requirements: Importing Farm Equipment Guidance](#)" document for assistance determining FMD-free regions, as well as statement and certificate requirements.

Company name: _____ Date: _____

Name of responsible individual: _____ Title: _____

Phone number: _____ Email: _____

Please return completed form to: _____

Please contact a Deringer service center with questions or send an email to [Deringer's Compliance Department](#).

Effective August 2020, certain data is required to import goods subject to APHIS Core, and both new and used farm machinery will be subject to these requirements. Any equipment or machinery that may come in contact with livestock or crops/soil will be subject to this regulation. As a result, importers must indicate on their commercial documents if the equipment being imported is new or used.

The regulatory definition of farm equipment is in 9CFR94.0: Farm equipment.

"Equipment used in the production of livestock or crops, including, but not limited to, mowers, harvesters, loaders, slaughter machinery, agricultural tractors, farm engines, farm trailers, farm carts, and farm wagons, **but excluding automobiles and trucks.**"

Some additional examples of farm equipment include:

- Plant nursery equipment (e.g., shovels, manure spreaders, seeding machines, etc.)
- Machines for preparation of meat or chicken (e.g., deli machines)
- Dairy equipment
- Farm machines, such as mowers, harvesters, loaders, slaughter machinery, agricultural tractors, farm engines, farm trailers, farm carts, and farm wagons
- Drilling equipment
